

2025 - 2026 Director Report

Equipment Director

This year marked the beginning of improving and organizing the equipment room. I would like to thank Cole Bostrom and CWC Architectural Millwork for building custom rolling carts to help optimize the unique spacing in the room. The equipment room is starting to look great, and we have made solid progress by implementing new systems for the collection and organization of jerseys and gear. These improvements will help make future distribution and collection processes much more efficient.

Our teams looked sharp on the ice in the white jerseys this season, though we are still working on a long-term plan to keep them consistently clean throughout the year. With proper care and extra effort, we were able to remove most stains, leaving the jerseys in great condition for next season. A more structured cleaning plan will be in place moving forward.

Thank you to all members, coaches, and managers for your patience and cooperation during the implementation of new processes this season. These changes are helping build a more organized, productive, and transparent system for managing jerseys and equipment going forward.
